

Grigore Any-Mary Ștefania

Frontend Developer | UI/UX Enthusiast

Bucharest, RO | +40 763 121 100 | stefaniagrigore91@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Frontend developer with hands-on experience gained through personal projects, web applications, and a personal portfolio website. Strong foundation in HTML, CSS, JavaScript, PHP, TypeScript, React and WordPress, complemented by basic SQL knowledge and version control using Git/GitHub.

TECHNICAL SKILLS

- **Frontend & UI Architecture:** JavaScript (ES6+), TypeScript (Basic), React (Components, Hooks, State Management), HTML5, CSS3 (Flexbox, Grid, Responsive Design), SCSS, Bootstrap, BEM Methodology.
- **Backend & Database:** PHP (Medium-complexity code), MySQL, SQL (Basic queries: SELECT, INSERT, UPDATE, DELETE).
- **CMS, Tools & Deployment:** Git, GitHub, Vite, Netlify, WordPress (Theme Customization), Eleventy (11ty).
- **Design Tools:** Adobe Photoshop, Figma (basic to intermediate).

EXPERIENCE & PROJECTS

Software Engineer Snowy Lizard – Mar/Apr

- **Core Architecture & Setup:** Bootstrapped a high-performance frontend using React and Vite, and packaged the application into a standalone desktop executable using Electron.
- **Hybrid Data Management:** Engineered a dual-layer database solution using IndexedDB for persistent local offline storage and Firebase for asynchronous cloud synchronization.
- **State & UI Orchestration:** Built a heavy-client architecture, managing complex local states, multi-step forms, and dynamic view rendering entirely within React.
- **Data Visualization & Export Suite:** Utilized Recharts to build dynamic data dashboards and developed a custom client-side reporting engine using html2canvas and jsPDF to natively generate PDF/CSV reports.
- **AI-Driven Engineering:** Orchestrated the entire development process using AI code generation tools. Designed the system architecture, component logic, and data flow, successfully utilizing AI to generate and implement the complex React and Electron codebase.

Frontend Developer | Independent Projects - *Present*

- Architected and developed a diverse portfolio of interactive web applications—including logic games, task managers, and utility tools—leveraging React, TypeScript, and state management.
- Utilized Git and GitHub for rigorous version control across all projects, maintaining clean code history and structured repositories.
- Solved technical issues independently using official documentation, debugging tools, and best practices.

Key Project Showcase: Personal Portfolio Website

- Designed and developed a modern, single-page portfolio to showcase frontend projects using semantic HTML5, Vanilla JavaScript, and modular CSS following the BEM methodology.
- Architected a fully responsive, mobile-first layout utilizing CSS Flexbox, CSS Grid, and fluid typography (clamp()) for a seamless cross-device experience.
- Engineered interactive UI components, including custom accordion and sticky navigation, leveraging optimized JavaScript event delegation.
- Maximized web performance by compressing assets into WebP formats and configured automated CI/CD deployment pipelines via Netlify.

EDUCATION & CERTIFICATIONS

- **Digital Nation - Generatia Tech** – Web Developer Explorer (2024 - 2025)
- **freeCodeCamp** – Responsive Web Design (2024)

- **Udemy** – Web Developement Bootcamp (2023)
- **GoIT** – Web Development Marathon (2023)

SOFT SKILLS & LANGUAGES

Skills: Problem-solving and analytical reasoning | Time management | Adaptability and continuous learning | Team collaboration and clear communication

Languages: **Romanian** (Native) | **English** (Upper-Intermediate / B2)
